

BACKGROUND SCREENING FOR

Continuous Driver Monitoring

Continuous Driver Monitoring

Hire Image's driver monitoring services continuously monitors driver licenses across the U.S. This service covers 49 states and DC, with different levels of violation and license status reporting. Should states with limited reporting release more information, the service will automatically include new information as it becomes available from the state.

Why Consider Continuous Driver Monitoring?

- For your employees that drive company or personal vehicles, you've likely ordered at least open motor vehicle record (MVR) for each of them. Consider the issues that may arise after the initial report.
- You need to know what your drivers are doing behind the wheel – and if they're becoming a liability to your company.

12-month program

\$28* per driver

- Cost is prorated for programs beginning July 1st or later. No refunds for drivers who leave the program prior to year-end.

* AR requires a \$5 enrollment fee/driver

* MD requires a \$12 enrollment fee/driver

*Separate DMV charge and access fees apply when an alert is received, and full DMV report obtained.

Hire Image LLC is a nationally accredited specialist in the field of background screening, drug testing and verification services. Our priority is to provide accurate and timely background screening reports, using our secure platform, thus enabling clients to make well-informed hiring and/or retention decisions. Our exceptional support system, live phone answering, compliance centric, and customized reporting is tailored specifically to meet client needs.
